# DiVi™

## Terms

# Terms & Conditions

## Pricing & Discounts

Pricing determined by size of order, zone location of dealer, and other criteria. Refer to your Authorized AIS Dealer Pricing Program for complete guidelines.

## Terms

A signed purchase order and 50% deposit are required for all orders, unless waived by an officer of Affordable Interior Systems Inc. (AIS). With approved credit, all balances are due within 30 days of invoice date.

## Purchase Order Requirements

- Purchase orders must be received by 12:00 noon EST in order for the following day to be considered start of ship date leadtime.
- The total net amount of order must be clearly indicated on all purchase orders.
- Account must be in good standing, and have no past due balance for purchase order to be accepted.
- Only authorized AIS Dealers may purchase from AIS. Dealers not placing orders with AIS for any 6-month period will be considered "inactive", and will require review by AIS sales management before any order will be accepted.
- Special pricing taken on any order must reference AIS Special Pricing Authorization (sales order number with authorization initials).
- If there are any discrepancies on purchase order, dealer will be required to "sign off" on final order detail. Signature by dealer constitutes acceptance of new purchase order amount and item details contained therein.

## Order Changes & Cancellations

AIS understands that from time to time changes may be required on orders, however, as all AIS products are produced custom for each order, changes and cancellations costs will be assessed based on the following schedule. Review your acknowledgement thoroughly. All dates below are from time of acknowledgement.

- No fee for orders changed or canceled within 1 day (24 hours) on Quick Ship orders, or within 2 days (48 hours) on Standard ship orders.
- A fee of 25% of the net pretax total of affected product if order is changed or canceled within 2 days (48 hours) on a Quick Ship order, or within 4 days (96 hours) on a Standard ship order.
- A fee of 50% of the net pretax total of affected product if order is changed or canceled within 3 days (72 hours) on a Quick Ship order, or within 7 days (168 hours) on a Standard ship order.
- A fee of 100% of the net pretax total of affected product if order is changed or canceled after 3 days (72 hours) on a Quick Ship order, or after 7 days (168 hours) on a Standard ship order.
- A fee of 100% of the net pretax total of all product on Rush Orders or orders with custom product if changed or canceled after 24 hours.

Any non-standard worksurface sizes, panels, fabrics, laminates, paint colors, or product modifications are considered custom. **Important:** Changing a product size to another size is considered a "cancellation" of one product for another, and falls under the above program.

## Fax Orders

Orders may be sent to AIS via fax to **978-567-5187**

## Add On Orders

Refer to your Authorized Dealer Program via AIS DealerNet for terms and conditions for add-on orders.

## Rush Orders

For orders required less than Quick Ship lead time, AIS will determine feasibility of meeting required lead time, and will assess the following "rush-fee" if request can be accommodated.

Add-on orders to original PO are considered "separate" orders, and will incur charges below if they require rush services as defined herein.

**7-9 Day Lead Time - Minimum 10% of NET**

**5-7 Day Lead Time - Minimum 15% of NET**

## Credit

Three trade references (including bank and account number) are required. All accounts with balances beyond 30 days of invoice date will be put on credit hold until the balance is paid in full.

## Acknowledgements

Every order is acknowledged. Orders will be manufactured and invoiced based upon the information on the acknowledgement. If there is any discrepancy, please notify AIS immediately. Orders are accepted by AIS per terms on the acknowledgement.

All acknowledgements contain an estimated shipping date. Your order may actually ship earlier than the estimated ship date, depending on the backlog at the time.

If you do not want the merchandise earlier than the specified date, please write "Do not ship for arrival before \_\_\_\_\_" on your purchase order.

## Freight Policy

FOB Origin. Delivery includes standard Monday through Friday 9am to 5pm deliveries. After-hours, holiday, weekend or specific time delivery requirements may be arranged for an additional charge. Delivery windows on all orders can be arranged through the freight carrier directly. You can receive your tracking information through the "Order Tracker" at [www.ais-inc.com](http://www.ais-inc.com) by entering the five digits of your sales order number.

**Please note:** Dealer may incur additional carrier Accessorial Fees. Accessorial Fees are any charges for services provided above the normal line haul freight charge. These charges generally happen "after" the delivery because the "special" shipping needs were not noted on the PO to set up accordingly in advance.

The most common causes of Accessorial fees are:

- detention charges
- redirect of product
- refusal of product
- can't accommodate certain size trucks
- lift gate required
- no loading dock
- street unloads
- storage

## Deductions

Deductions from invoices are not allowed, for any reason, without authorization from AIS.

## Delay of Shipment

Acceptance of AIS acknowledgement confirms order ship date. If dealer requests delay of shipment for any period greater than 1 day from scheduled ship date, the following storage fees will be assessed. Dealer must submit purchase order for estimated storage costs:

**Orders less than full trailer** - \$25/day/pallet.

**Full trailer** - \$300/day/trailer

## Freight Claims

Dealer is responsible for filing freight claims with the carrier directly. Contact and freight claim information for all regularly used AIS carriers is available at [www.ais-inc.com](http://www.ais-inc.com). Dealer must notify AIS customer service of freight damage immediately in order to initiate the replacement process, and submit a complete purchase order for replacement product. **Damaged freight can not be refused** by consignees; carton damage does not infer damaged merchandise. Freight claim should be filed after delivery has been accepted, with damage noted on delivery receipt. Concealed Damage Claims: Concealed damage claims must be filed with carrier under normal freight claim guidelines. No deduction under any circumstances resulting from freight claims may be made by the customer when settling invoices with AIS. Consignee is responsible for holding damaged merchandise until claim is settled. In the unfortunate event you have to file a freight claim, feel free to Contact AIS Customer Service for assistance with getting your claim filed. AIS cannot file the freight claim on your behalf, but our team can help make sure you have the information you need to be successful in working with the carrier.

## Force Majeure

Seller shall not be liable for failure to perform or for delay in performance due to fire, flood, strike, or any other labor difficulty, act of God, act of any governmental authority or of the Purchaser, riot, embargo, fuel or energy shortage, wrecks or delay in transportation, inability to obtain necessary labor, materials, or manufacturing facilities from usual sources or failure of suppliers to meet their contractual obligations or due to any cause beyond its reasonable control. In the event of delay in performance due to any such cause, Seller reserves the right to extend the date of delivery or time for completion by a period of time reasonably necessary to overcome the effect of such delay, to allocate any available supply of goods in a manner it deems reasonable, or to cancel any purchase order.

## Requests for Specific Delivery Time(s)

AIS will gladly accept requests for delivery times and for drop shipments to job sites. AIS will do its best to make the requests to the carriers, and in certain cases will extend the option of additional cost for a carrier guaranteed set delivery time. AIS is not responsible for any damages incurred for any late deliveries, including labor other charges resulting from unforeseen delays by any AIS or dealer chosen carrier. It is the option of the dealership to request Drop Shipments. AIS strongly urges dealers to take into consideration the risk that carriers typically allow for a 2-4 hour delivery window, and even when you pay for a set delivery time, the carrier is only liable for that additional charge, not for labor or other damages. AIS dealers must sign a Drop Shipment liability release form for drop shipments requesting specific delivery time.

## Liability

Seller, its contractors, authorized dealers and subcontractors or suppliers of any tier shall not be liable in contract, in tort (including negligence and/or strict liability) or otherwise for any special, indirect, incidental or consequential damages whatsoever, including, without limitations, damages or loss of other property or equipment, loss of profits or revenue or loss of use of equipment (including additional expenses incurred in using existing facilities.)

The remedies set forth herein are exclusive, and the liability of Seller with respect to any contract or anything done in connection therewith, such as the performance or breach thereof, or from the manufacture, sale, delivery, resale or use of any Product covered by or furnished under the order, whether in contract, in tort (including negligence and/or strict liability) or otherwise shall not exceed the price of the Product or part on which such liability is based.

## Local Codes

Seller considers its product to be office furniture and subject to all applicable local fire, electrical and building codes. Since local codes may vary, the purchaser is responsible for the proper application and installation of Affordable Interior Systems product in accordance with the requirements of these local codes. Engineering, research and testing have been conducted to have electrical components of AIS products conform to national electrical codes. Only Underwriters Laboratories tested and approved electrical components are used in electrical devices. In addition all panels and components used by AIS have been UL approved. Seller shall not be responsible for any damages or expenses resulting from Purchaser's specifications not conforming to the requirements of the law or local building codes, unless it specifically agrees in writing to do so. Since Seller has no control over the use to which others may put its Products, each user or specifier should determine the Products' suitability for the particular application.

## Lifetime Warranty

This warranty is given to the initial purchaser and is valid for as long as the product is owned by the original Buyer. The warranty, which runs from the date of manufacture covers defects in materials and craftsmanship found during normal usage of the products during warranty period. If a product is defective, and if written notice of the defect is given to AIS within the Applicable Warranty Period, AIS at its option will either repair or replace the defective product with comparable component or product. The Lifetime Warranty applies to all products regardless of the numbers of shifts the product is used each day except as noted above.

### Applicable Warranty Period Products / Restrictions

Lifetime (as defined above) All AIS branded products. (Except as noted below).

Ten (10) Years Electrical products and seating mechanisms

Five (5) Years Moving parts, which include keyboard mechanisms, glides, suspensions, casters as well as all AIS fabrics.

This warranty does not apply to "normal wear and tear", damage caused by carrier, damage caused by transport or product from one site or location to another, alterations to the product not expressly authorized by Seller, and products considered to be of a consumable nature such as bulbs and light ballast. It also does not apply to "Customer's Own Material" (i.e. material specified by Buyer that is not a standard AIS product offering) used in the manufacture of AIS products. A product will not be considered defective, and Seller will not be obligated to replace it, if the product is not installed properly, or is used in a "non-standard" fashion as prescribed by AIS. It is at the sole discretion of AIS to make a determination if defect is due to improper product installation.

This warranty is presented in lieu of all other warranties, express or implied, including, but not limited to, any implied warranties of merchantability of fitness for a particular purpose. The customers exclusive remedy with respect to any and all losses or damages resulting from any cause whatsoever shall be repair or replacement as specified above.

**Seller (AIS) shall not be liable under any circumstances for consequential, economic, or incidental damages of any nature, including without limitation, damages for personal injury or damages to property, and however occasioned, whether alleged as resulting from breach of warranty or contract by AIS or negligence of AIS or otherwise.**

International Warranties may differ.

## AIS Supported Specification Software

AIS at no cost provides symbols and data libraries for the following applications. Only Authorized AIS Dealers may purchase AIS products. AIS supported software libraries are:

- 20/20 GIZA
- 20/20 CAP
- Project Matrix
- Data One

# Quick Ship Leadtime Program

## 10 Working Days

### Conditions

10 day leadtime **does not include** 24-hour order processing period.

Orders missing part numbers and corresponding required finish information are considered incomplete. These orders will not be processed until correct information is received.

Lead time begins 24 hours after receipt of complete and processable order as defined in the purchase order requirement section of this program.

Orders over \$300k list may require additional lead time based on factory or supply conditions. Please contact customer service to verify lead time availability before placing order.

Quick Ship status is applied to certain products with certain finishes. See below. Quick Ship status will not be assigned unless all items on an order are available as Quick Ship items and are furnished with Quick Ship finishes. **Customer must specifically request Quick Ship status on order or purchase order.** If Quick Ship status is not indicated on order or purchase order, order will be placed with standard ship leadtime. AIS Customer Service will confirm ship date on AIS Order Acknowledgement.

Hanger Frame has a slot pattern on a 1 inch standard increment for hang on components. Slots are 3/4 inch tall x approximately 1/8 inch wide. Hanger Frame is factory installed and removal is **not required** for panel installation.

Straight / 180 Connection

The Panel Connection Hinge is able to be used in numerous types of panel connections as shown below. No other panel connection hardware is needed to connect panels. However, Base Raceway Shrouds are required for certain 2-way and 3-way applications to cover electrical and data cables.

Hanger Frame face is factory finished and requires **no** endcap or HiLo trim after panel installation.

(45/135 deg) 2-way raceway shroud

(60/120 deg) 2-way raceway shroud

2-way 45/135 degree

2-way 60/120 degree

Hanger Frame Topcap is field installed and remains easily removable to facilitate panel installation and reconfiguration.

Panel Topcap is factory installed. Topcaps on Permanent Monolithic panels are fixed. Topcaps on Insert panels are removable to facilitate insert replacement.

(90 deg) 2-way raceway shroud

(90 deg) 3-way raceway shroud

2-way 90 degree

3-way 90 degree

Panel Polypropylene Hinge inserts into hinge channels built into every Hanger Frame in order to connect panels together. A 29 inch length is inserted to the bottom and then an additional length for each panel height needed.

3-way 120 degree

4-way 90 degree

Hinge channels in Hanger Frame form a 90 degree angle when 2 panels are aligned in a straight line. The hinge is extruded at this angle and installs easily when panels are started at this angle. After installation of hinge, panels can be rotated to achieve other angles.

# DiVi Panel Details and Specifications

DiVi™

## Details and Specifications

Alignment Plate holds panels in vertical alignment and prevents panel shear.

8 wire 4 circuit powerway is included with every powered panel and is factory installed.

Raceway Glides are adjustable up to 1 3/4 inch for installation on unlevel floors and include carpet grippers.

Metal Raceway Divider (optional) separates low voltage data cables and high voltage electrical cables if desired. Divider attaches to raceway glides and is retrofitable on installed panels.

Base Cover Assembly ships separate as one piece and installs by sliding under panel after panel installation, hinging up and snapping to the underside of the panel. Non-powered or Powered base covers are shipped with Non-powered or Powered panels, respectively. Base Covers have a small "mud flap" for data cable egress.

Duplex Outlets are ordered separately. 2 outlets can be used per side, 4 total per panel. Outlets utilize top base cover holes.

Duplex Outlet Covers cover unused duplex outlet or data locations. (4) are shipped with every panel. Order extra as needed.

Snap In Data Jack Housing (order separately) accommodates 6 Hubbel or compatible data/voice jacks. Snap In Housings **may not** be used **Back to Back** on a spine wall. See below.

Data Cable raceway cavity is approximately 2 inches wide by 3 inches tall and can accommodate between 32 and 40 Cat 6 data cables, depending on how tightly they are packed.

Cat 5 and 6 Data Jacks extend beyond center line of raceway, preventing jack housings to be used back to back on a spine. Plan on using "cross corners" on panel to eliminate this issue.

# Sliding Door (Non-Locking)

## Product Description

Sliding Door attaches to frame face at either left or right, outside or inside of an opening. Sliding Doors are available to accommodate 36, 42 and 48 inch wide openings, 66 or 82 inches in height. Lightweight, aluminum frame, painted as specified, with either Ribbed Lexan or Pebble Glass insert. Sliding Door extends 2 1/4 inches into opening when fully open, and stands a total of 1 3/4 inches off panel face. These dimensions should be taken into consideration when planning for ADA door openings and aisle dimension requirements if door is mounted on outside of office. Actual door thickness is 1 inch. Actual door width is opening size + 8.5 inches. Thus a door for a 42 inch wide opening is 50.5 inches. This is how much space MUST be free of obstructions next to the opening for the screen to fully open.

## Insert Panels

## Details and Specifications

### Insert Panels

Solid core panel with slide and stack inserts. Topcap is removable to facilitate insert replacement.

#### Model Number Choices

- Side A Elevation (Segmented or Monolithic)
- Side B Elevation (Segmented or Monolithic)
- Powered or Non-powered

#### Option Choices

- Side A Insert Type and Fabric/Color Positions 1-4 Possible
- Side B Insert Type and Fabric/Color Positions 1-4 Possible
- Panel Trim Color (Side Rails and Topcap)
- Insert Retainer Color (Horizontal Bars between inserts)
- Base Cover Color
- With or Without Data Access Holes
- With or Without Raceway Divider
- Glass Insert Style \* Half and Quarter Glass Panels only.

**Actual Height = Nominal - 1/16"**

**Actual Width = Nominal + 1/8"**

Insert Panel topcaps can be removed to facilitate insert replacement.

Inserts are removable by sliding out from the top of the hanger frame channels

Insert retainers separate tiles horizontally and may be removed by sliding up and out of the top of the panel.

Hanger Frame has a slot pattern on a 1 inch standard increment for hang on components. Slots are 3/4 inch tall x approximately 1/8 inch wide. Hanger Frame is factory installed and removal is **not required** for panel installation.

Straight / 180 Connection

The Panel Connection Hinge is able to be used in numerous types of panel connections as shown below. No other panel connection hardware is needed to connect panels. However, Base Raceway Shrouds are required for certain 2-way and 3-way applications to cover electrical and data cables.

Hanger Frame face is factory finished and requires **no** endcap or HiLo trim after panel installation.

(45/135 deg) 2-way raceway shroud

(60/120 deg) 2-way raceway shroud

2-way 45/135 degree

2-way 60/120 degree

Hanger Frame Topcap is field installed and remains easily removable to facilitate panel installation and reconfiguration.

Panel Topcap is factory installed. Topcaps on Permanent Monolithic panels are fixed. Topcaps on Insert panels are removable to facilitate insert replacement.

(90 deg) 2-way raceway shroud

(90 deg) 3-way raceway shroud

2-way 90 degree

3-way 90 degree

Panel Polypropylene Hinge inserts into hinge channels built into every Hanger Frame in order to connect panels together. A 29 inch length is inserted to the bottom and then an additional length for each panel height needed.

3-way 120 degree

4-way 90 degree

Hinge channels in Hanger Frame form a 90 degree angle when 2 panels are aligned in a straight line. The hinge is extruded at this angle and installs easily when panels are started at this angle. After installation of hinge, panels can be rotated to achieve other angles.

# DiVi Insert Panel Details and Specifications

DiVi™

## Details and Specifications

Alignment Plate holds panels in vertical alignment and prevents panel shear.

8 wire 4 circuit powerway is included with every powered panel and is factory installed.

Raceway Glides are adjustable up to 1 3/4 inch for installation on unlevel floors and include carpet grippers.

Metal Raceway Divider (optional) separates low voltage data cables and high voltage electrical cables if desired. Divider attaches to raceway glides and is retrofitable on installed panels.

Base Cover Assembly ships separate as one piece and installs by sliding under panel after panel installation, hinging up and snapping to the underside of the panel. Non-powered or Powered base covers are shipped with Non-powered or Powered panels, respectively. Base Covers have a small "mud flap" for data cable egress.

Duplex Outlets are ordered separately. 2 outlets can be used per side, 4 total per panel. Outlets utilize top base cover holes.

Duplex Outlet Covers cover unused duplex outlet or data locations. (4) are shipped with every panel. Order extra as needed.

Snap In Data Jack Housing (order separately) accommodates 6 Hubbel or compatible data/voice jacks. Snap In Housings **may not** be used **Back to Back** on a spine wall. See below.

Data Cable raceway cavity is approximately 2 inches wide by 3 inches tall and can accommodate between 32 and 40 Cat 6 data cables, depending on how tightly they are packed.

Cat 5 and 6 Data Jacks extend beyond center line of raceway, preventing jack housings to be used back to back on a spine. Plan on using "cross corners" on panel to eliminate this issue.

For instance, a 66 x 36 segmented panel has a total of 6 inserts (3 inserts per side).  
If the 3 inserts on Side A were to be Grade B fabric the upcharge for the panel would be \$47.

- Side A Position 1, 27 x 36 insert Grade B Upcharge = \$21
- Side A Position 2, 16 x 36 insert Grade B Upcharge = \$13
- Side A Position 3, 16 x 36 insert Grade B Upcharge = \$13
- Total upcharge = **\$47** for the panel.

If the Position 1 and Position 2 inserts on Side A were to be Grade B fabric,  
and the Position 3 insert on Side A were to be Grade C fabric the upcharge for the panel would be \$61.

- Side A Position 1, 27 x 36 insert Grade B Upcharge = \$21
- Side A Position 2, 16 x 36 insert Grade B Upcharge = \$13
- Side A Position 3, 16 x 36 insert Grade C Upcharge = \$27
- Total upcharge = **\$61** for the panel.

If all 6 inserts (3 on Side A, 3 on Side B) were to be Grade B fabric, the Grade B fabric upcharge  
for the panel would be \$94.

- Side A Position 1, 27 x 36 insert Grade B Upcharge = \$21
- Side B Position 1, 27 x 36 insert Grade B Upcharge = \$21
- Side A Position 2, 16 x 36 insert Grade B Upcharge = \$13
- Side B Position 2, 16 x 36 insert Grade B Upcharge = \$13
- Side A Position 3, 16 x 36 insert Grade B Upcharge = \$13
- Side B Position 3, 16 x 36 insert Grade B Upcharge = \$13
- Total upcharge = **\$94** for the panel.

# Quarter Glass Insert Panel

## Monolithic Front - Segmented Back / Non-Powered

### Product Description

Solid core blank panel with tempered glass window insert and painted metal trim, with monolithic "insert" surface on front side and segmented "insert" surface on back side. Glass is available in a variety of tints and textures. Inserts are preconfigured and factory installed. Inserts **do not** need to be removed for installation. Inserts can be removed for replacement in the field, or elevations or fabric colors can easily be changed. Blank base covers are included. Panels may be ordered with Power/Data Access base covers and or Raceway Divider. Each panel includes all connection hinges needed for each panel. **Raceway Shrouds are sold separately. See page 4-2.**

### Options

- Side A Position 1 Type and Color
- Side B Position 1-3 Type and Color
- Panel Trim Color (Side Rails and Topcap)
- Glass Insert Style/Color
- Base Cover Color
- Insert Retainer Color
- With or Without Data Access Holes
- With or Without Raceway Divider

Insert Panels are preconfigured and factory installed.

Refer to Fabric Pricing Page for Grade B and Grade C fabric pricing. See page 3-6.

## Product Description

Solid core blank panel with tempered glass window insert and painted metal trim, with monolithic “insert” surface on front side and segmented “insert” surface on back side. Glass is available in a variety of tints and textures. Inserts are preconfigured and factory installed. Inserts **do not** need to be removed for installation. Inserts can be removed for replacement in the field, or elevations or fabric colors can easily be changed. 8 wire 4 circuit powerway and Power/Data Access base covers are included. Panels may be ordered with a Raceway Divider. Each panel includes all connection hinges needed for each panel. **Raceway Shrouds are sold separately. See page 4-2.**

## Options

- Side A Position 1 Type and Color
- Side B Position 1-3 Type and Color
- Panel Trim Color (Side Rails and Topcap)
- Glass Insert Style/Color
- Base Cover Color
- Insert Retainer Color
- With or Without Raceway Divider

Insert Panels are preconfigured and factory installed.

Refer to Fabric Pricing Page for Grade B and Grade C fabric pricing. See page 3-6.

# Raceway Shrouds

## Product Description

Raceway shrouds are required to trim base raceways at panel connections for the purpose of sealing data and electrical cables. Shrouds are **Ordered Separately**. Shrouds may be ordered with a divider or without, depending if a metal divider is used on adjacent panels. Straight line, 180 degree connections **Do Not** require a shroud.

# Rules for Panel Stability w/out Components

## Product Description

The guidelines outlined below should be followed when designing AIS DiVi panels without components to ensure panel stability and safety. Change of heights do not effect panel stability. Note that any panel not directly attached to a perpendicular panel or fixed wall will yield when pressure is applied.

## Panel Stability Without Components

# Rules for Panel Stability with Components

## Product Description

The guidelines outlined below should be followed when designing AIS DiVi panels without components to ensure panel stability and safety. Change of heights do not effect panel stability. Note that any panel not directly attached to a perpendicular panel or fixed wall will yield when pressure is applied. \* IMPORTANT - 30" worksurfaces must be supported at the front with side support brackets or floor support elements/pedestals.

# DiVi<sup>TM</sup>

# Electrical

# Electrical Components - 8 wire, 4 circuit Wiring Schematic

## Description

The DiVi 8 Wire 4 Circuit electrical system contains (4) circuits. Each circuit is rated at 20 amps/120 volts maximum. Circuit 1, Circuit 2 and Circuit 3 are served by a system neutral and an equipment ground. Circuit 4 is dedicated and is served by its own neutral and ground. Circuit and ground conductors are #12 A.G.W.(gauge). **All neutrals are #10 A.G.W. (gauge)**

## Wiring Schematic

Duplex outlets are available designated circuits one through four. Each duplex outlet contains (2) single receptacles (places to plug into) of the same circuit. The following schematic details each specific duplex configuration. Conductors are shown top to bottom in actual stacking order as powerways.

## Cable Cross Section

Shown below is cross section of metal cable used for 8 Wire 4 Circuit Jumpers and Infeeds. Circuit and ground conductors are #12 A.G.W.(gauge). **All neutrals are #10 A.G.W. (gauge)**

### CROSS SECTION 8 WIRE 4 CIRCUIT CABLE

# Electrical Components - 8 wire, 4 circuit

DiVi™

## Product Description

8 Wire 4 Circuit electrical is the standard electrical for AIS DiVi. For all other systems see "Specials". Powered panels include a powerway only. All other components shown below are specified separately.

## Powerways

Powerways provide electrical distribution and access for duplex outlets back to back. **One powerway is shipped with every powered panel.** 24" wide panels can accept only (1) duplex outlet per side, (2) total back to back. All other panels can accept (2) per side, (4) total back to back. Powerways are factory installed but may be ordered separately to convert non-powered panels to powered panels. Powerways "grow" in length with panels of greater width, making panel to panel connections a "standard" configuration and allowing for "pass through" connections. Each powerway has location for up to four jumpers. Two at each end.

## Duplex Outlets

Duplex outlets are available designated circuits one through four. Each duplex outlet contains (2) single receptacles (places to plug into) of the same circuit. Duplex outlets are specified separately from powerways. All duplex outlets have BLACK faces. The lettering on outlets for Circuit 1, 2 and 3 is white. The lettering on outlets for Circuit 4 is orange. Outlets are screw mounted to powerway.

**Jumpers**

**Panel to panel jumper** - connects any two adjacent powered panels connected in a straight line or at a 90 degree angle. (A)

**Extended panel to panel jumper** - is extended 1 11/16" to connect any two powered panels across the gap created by a threeway or fourway connection. 90 degree corners and straight panel to panel connections do not require an extended jumper. (B)

**Pass through jumper** - passes through a non-powered panel to connect two powered panels. Specify the jumper that corresponds to the width of the panel to be passed through.

**Extended pass through jumper** - is extended 1 11/16" to pass through a non-powered panel and the additional gap created by a threeway or fourway connection to connect two powered panels. 90 degree corners and straight panel to panel connections do not require an extended jumper. Specify the jumper that corresponds to the width of the panel to be passed through. (D)

## Base Feeds and Ceiling Feeds

**Receptacle mounted base feed (right and left hand)** - provides interface with building power at the base of the panel and mounts to powerway at duplex outlet location. Each base feed is six feet in length, encased in "liquid tight". **NOTE:** New York City code requires the use of a special base feed with an in line junction box. See facing page. (A & B)

**Side mounted base feed** - provides interface with building power at the base of the panel and mounts to powerway at jumper location. Each base feed is six feet in length, encased in "liquid tight". **NOTE:** New York City code requires the use of a special base feed with an in line junction box. See facing page. (C)

**Ceiling feed** - provides interface with building power from a suspended ceiling through a power pole shell. Each ceiling feed is 12 feet long. Powerpole shells are ordered separately.

AIS™

# Electrical Components - 8 wire, 4 circuit

## Description

8 Wire 4 Circuit electrical is the standard electrical for AIS DiVi. For all other systems see "Specials". Powered panels include a powerway only. All other components shown below are specified separately.

## New York City

New York City requires the use of a special base feed / junction box combo which allows for easy access to electrical hardware connections in the panel raceway.

## Chicago

Certain areas of Chicago prohibit the use of modular electrical systems and require all electrical components to be hardwired. Where receptacles are desired **Order AIS DiVi Non-powered panels with data/Chicago option** to receive non-powered panels with duplex receptacle holes. Note, Chicago code does not require the use of special base covers. Receptacles in Chicago and all other electrical raceway components are supplied by the electrician.

# Extended Rectangular Worksurfaces

## Product Description - 2mm Edge

Worksurfaces are constructed from high density 45 lb particleboard, laminated with high pressure laminate. All edges are a 2 Millimeter PVC. **Worksurface support hardware is specified separately.** Grommets are specified with worksurface options.

**Product Number: W-WS2424MW**  
W-WS is the base product number for Extended Rectangular 2mm tops.

## Product Description - Waterfall Edge

Worksurfaces are constructed from high density 45 lb particleboard. User edge is a 1/2" Radius, 90 Degree PVC Edge. All other edges are a 1/2 Millimeter PVC. **Worksurface support hardware is specified separately.** Grommets are specified with worksurface options.

**Product Number: W-WSRE2424MW**  
W-WSRE is the base product number for Rectangular Waterfall tops.

# Corner Worksurfaces - Extended Return Rectilinear

## Product Description - 2mm Edge

Worksurfaces are constructed from high density 45 lb particleboard, laminated with high pressure laminate. All edges are a 2 Millimeter PVC. **Worksurface support hardware is specified separately.** Grommets are specified with worksurface options.

Corner worksurfaces are designed to fit in a 90 degree corner. **Extended Return Corners** are designed to be used where the left panel width of the corner is different from the right panel width, or where 2 panels form one side of a corner situation but only one worksurface is desired.

### Product Number: W-WSCE243642

W-WSCE is the base product number for Corner Rectilinear Extended Return 2mm tops.

## Product Description - Waterfall Edge

Worksurfaces are constructed from high density 45 lb particleboard. User edge is a 1/2" Radius, 90 Degree PVC Edge. All other edges are a 1/2 Millimeter PVC. **Worksurface support hardware is specified separately.** Grommets are specified with worksurface options.

### Product Number: W-WSCERE243642

# Corner Worksurfaces - Type A Curvilinear

## Product Description - 2mm Edge

Worksurfaces are constructed from high density 45 lb particleboard, laminated with high pressure laminate. All edges are a 2 Millimeter PVC. **Worksurface support hardware is specified separately.** Grommets are specified with worksurface options.

Corner worksurfaces are designed to fit in a 90 degree corner.

**Product Number: W-WSCC2436**

W-WSCC is the base product number for Corner Curvilinear Type A 2mm tops.

## Product Description - Waterfall Edge

Worksurfaces are constructed from high density 45 lb particleboard. User edge is a 1/2" Radius, 90 Degree PVC Edge. All other edges are a 1/2 Millimeter PVC. **Worksurface support hardware is specified separately.** Grommets are specified with worksurface options.

**Product Number: W-WSCCRE2436**

W-WSCCRE is the base product number for Corner Curvilinear Type A Waterfall tops.

# Corner Worksurfaces - Extended Return Curvilinear

## Product Description - 2mm Edge

Worksurfaces are constructed from high density 45 lb particleboard, laminated with high pressure laminate. All edges are a 2 Millimeter PVC. **Worksurface support hardware is specified separately.** Grommets are specified with worksurface options.

Corner worksurfaces are designed to fit in a 90 degree corner. Extended return corners are designed to be used where the left panel width of the corner is different from the right panel width, or where 2 panels form one side of a corner situation but only one worksurface is desired.

**Product Number: W-WSCCE243642**

W-WSCC is the base product number for Corner Curvilinear Extended Return 2mm tops.

## Product Description - Waterfall Edge

Worksurfaces are constructed from high density 45 lb particleboard. User edge is a 1/2" Radius, 90 Degree PVC Edge. All other edges are a 1/2 Millimeter PVC. **Worksurface support hardware is specified separately.** Grommets are specified with worksurface options.

**Product Number: W-WSCCERE243642**

W-WSCCRE is the base product number for Corner Curvilinear Extended Return Waterfall tops.

# D-top Corner Worksurfaces - Curvilinear

## Product Description - 2mm Edge

Worksurfaces are constructed from high density 45 lb particleboard, laminated with high pressure laminate. All edges are a 2 Millimeter PVC. **Worksurface support hardware is specified separately.** Grommets are specified with worksurface options.

Corner worksurfaces are designed to fit in a 90 degree corner. D-top corners combine the efficiency of a corner worksurface with the conferencing characteristics of a D-top.

**Product Number: W-WSCCDR244260**  
 W-WSCCDR is the base product number for D-top Corner Curvilinear Extended Return (Right Hand) 2mm tops.

## Product Description - Waterfall Edge

Worksurfaces are constructed from high density 45 lb particleboard. User edge is a 1/2" Radius, 90 Degree PVC Edge. All other edges are a 1/2 Millimeter PVC. **Worksurface support hardware is specified separately.** Grommets are specified with worksurface options.

**Product Number: W-WSCCDRE244260**  
 W-WSCCDRE is the base product number for D-top Corner Curvilinear Extended Return (Right Hand) Waterfall tops.

# Rectangular Panel Top Worksurfaces

## Product Description - 2mm Edge

Worksurfaces are constructed from high density 45 lb particleboard, laminated with high pressure laminate. All edges are a 2 Millimeter PVC. **Worksurface support hardware is specified separately.**

Panel top worksurfaces are designed to straddle low panels for transaction purposes and are connected to panels with countertop brackets.

**Product Number: W-CT1524**

W-CT is the base product number for Rectangular Panel Top 2mm tops.

## Product Description - Waterfall Edge

Worksurfaces are constructed from high density 45 lb particleboard. User edge is a 1/2" Radius, 90 Degree PVC Edge. All other edges are a 1/2 Millimeter PVC. **Worksurface support hardware is specified separately.**

**Product Number: W-CTRE1524**

W-CTRE is the base product number for Rectangular Panel Top Waterfall tops.

# Corner Panel Top Worksurfaces

## Product Description - 2mm Edge

Worksurfaces are constructed from high density 45 lb particleboard, laminated with high pressure laminate. All edges are a 2 Millimeter PVC. **Worksurface support hardware is specified separately.**

Corner panel top worksurfaces are designed to straddle low panels for transaction purposes and are connected to panels with countertop brackets.

**Product Number: W-CT1524MW**

W-CT is the base product number for Corner Panel Top 2mm tops.

# Fin Worksurfaces

## Product Description - 2mm Edge

Worksurfaces are constructed from high density 45 lb particleboard, laminated with high pressure laminate. All edges are a 2 Millimeter PVC. **Worksurface support hardware is specified separately.** Grommets are specified with worksurface options.

Fin worksurface design based on an ellipse divided into quarters. Straight sides measure nominal panel width dimensions.

### Left Hand

**Product Number: W-WSFINL2436**

W-WSFINL is the base product number for Fin (Left Hand) 2mm tops.

## Product Description - Waterfall Edge

Worksurfaces are constructed from high density 45 lb particleboard. User edge is a 1/2" Radius, 90 Degree PVC Edge. All other edges are a 1/2 Millimeter PVC. **Worksurface support hardware is specified separately.** Grommets are specified with worksurface options.

### Left Hand

**Product Number: W-WSFINLRE2436**

W-WSFINLRE is the base product number for Fin (Left Hand) Waterfall tops.

### Actual Dimensions

# Arrow Worksurface

## Product Description - 2mm Edge

Worksurfaces are constructed from high density 45 lb particleboard, laminated with high pressure laminate. All edges are a 2 Millimeter PVC. **Worksurface support hardware is specified separately.** Grommets are specified with worksurface options.

Arrow worksurfaces are designed to create a conference style D-top at a corner situation.

**Product Number: W-WSCD3660**

W-WSCD is the base product number for Arrow 2mm tops.

## Product Description - Waterfall Edge

Worksurfaces are constructed from high density 45 lb particleboard. User edge is a 1/2" Radius, 90 Degree PVC Edge. All other edges are a 1/2 Millimeter PVC. **Worksurface support hardware is specified separately.** Grommets are specified with worksurface options.

**Product Number: W-WSCDRE3660**

W-WSCDRE is the base product number for Arrow Waterfall tops.

# 120 Degree Corner Worksurfaces

## 120C-90L-90R - Depth Transition

### Product Description - 2mm Edge

Worksurfaces are constructed from high density 45 lb particleboard, laminated with high pressure laminate. All edges are a 2 Millimeter PVC. **Worksurface support hardware is specified separately.** Grommets are specified with worksurface options.

120 degree Corner worksurfaces are designed to fit in a 120 degree corner. **DEPTH TRANSITION** corner worksurfaces allow transition from 24" deep worksurfaces on one side of the corner, to 30" on the other side.

### Product Description - Waterfall Edge

Worksurfaces are constructed from high density 45 lb particleboard. User edge is a 1/2" Radius, 90 Degree PVC Edge. All other edges are a 1/2 Millimeter PVC. **Worksurface support hardware is specified separately.** Grommets are specified with worksurface options.

### Actual Dimensions

Depth Right (Dim A)	24" , 30"
Depth Left (Dim B)	30" , 24"
Width (Dim C)	42" , 48"
Radius A	18"

# 120 Degree Corner Worksurfaces 120C-90L-90R - Depth Transition

## Grommet Options

Grommet holes are 2 3/4" outside diameter, 2 5/8" inside diameter (inside sleeve). Grommet covers are available in grey and black. Grommet covers are included with grommet options. Specify option and color. Grommet covers may also be purchased separately.

## 120C-90L-90R - Extended Return Depth Transition

### Product Description - 2mm Edge

Worksurfaces are constructed from high density 45 lb particleboard, laminated with high pressure laminate. All edges are a 2 Millimeter PVC. **Worksurface support hardware is specified separately.** Grommets are specified with worksurface options.

120 degree Corner worksurfaces are designed to fit in a 120 degree corner. Extended return corners are designed to be used where the left panel width of the corner is different from the right panel width, or where 2 panels form one side of a corner situation but only one worksurface is desired. **DEPTH TRANSITION** corner worksurfaces allow transition from 24" deep worksurfaces on one side of the corner, to 30" on the other side.

### Product Description - Waterfall Edge

Worksurfaces are constructed from high density 45 lb particleboard. User edge is a 1/2" Radius, 90 Degree PVC Edge. All other edges are a 1/2 Millimeter PVC. **Worksurface support hardware is specified separately.** Grommets are specified with worksurface options.

# 120 Degree Return Worksurfaces

## Product Description - 2mm Edge

Worksurfaces are constructed from high density 45 lb particleboard, laminated with high pressure laminate. All edges are a 2 Millimeter PVC. **Worksurface support hardware is specified separately.** Grommets are specified with worksurface options.

## Product Description - Waterfall Edge

Worksurfaces are constructed from high density 45 lb particleboard. User edge is a 1/2" Radius, 90 Degree PVC Edge. All other edges are a 1/2 Millimeter PVC. **Worksurface support hardware is specified separately.** Grommets are specified with worksurface options.

## 135C-90L-90R - Extended Return

### Product Description - 2mm Edge

Worksurfaces are constructed from high density 45 lb particleboard, laminated with high pressure laminate. All edges are a 2 Millimeter PVC. **Worksurface support hardware is specified separately.** Grommets are specified with worksurface options.

135 degree Corner worksurfaces are designed to fit in a 135 degree corner. Extended return corners are designed to be used where the left panel width of the corner is different from the right panel width, or where 2 panels form one side of a corner situation but only one worksurface is desired.

### Product Description - Waterfall Edge

Worksurfaces are constructed from high density 45 lb particleboard. User edge is a 1/2" Radius, 90 Degree PVC Edge. All other edges are a 1/2 Millimeter PVC. **Worksurface support hardware is specified separately.** Grommets are specified with worksurface options.

# 60 and 120 Degree Spanner Pie Worksurfaces

## Product Description - 2mm Edge

Worksurfaces are constructed from high density 45 lb particleboard, laminated with high pressure laminate. All edges are a 2 Millimeter PVC. **Worksurface support hardware is specified separately.**

Pie worksurfaces are designed for spanning from one station to the next and provide a common space for adjacent workers to meet.

## Product Description - Waterfall Edge

Worksurfaces are constructed from high density 45 lb particleboard. User edge is a 1/2" Radius, 90 Degree PVC Edge. All other edges are a 1/2 Millimeter PVC. **Worksurface support hardware is specified separately.**

# 120 Degree Pie Worksurfaces

## Product Description - 2mm Edge

Worksurfaces are constructed from high density 45 lb particleboard, laminated with high pressure laminate. All edges are a 2 Millimeter PVC. **Worksurface support hardware is specified separately.**

Quarter Round worksurfaces are designed to fit "inside" panel width dimensions and are not intended for use to span between two workstations. See Spanner Pie worksurfaces on previous page for spanner applications.

# 24 Inch Deep Regular Cantilevers

## Product Description

Regular cantilevers provide cantilevered worksurface support from panel or walltrack at either the left or right hand side of worksurface. All worksurface support components fasten directly to worksurfaces with screws. Regular cantilevers may also be used as a center support. Specify cantilever that corresponds to worksurface depth. **Cantilevers are painted black as a standard. Every other color requires a \$10 list price upcharge.**

# Flatplates and “V” Channels

## Product Description

Flatplates are used to splice two worksurfaces together at front edge. May also be used to provide direct support for return worksurfaces. “V” channels mount to underside of longer worksurfaces to provide bracing where center support cantilever is not possible. All worksurface support components fasten directly to worksurfaces with screws. **Flatplates and “V” Channels are available in Black only.**

# Full Laminate Support Panels

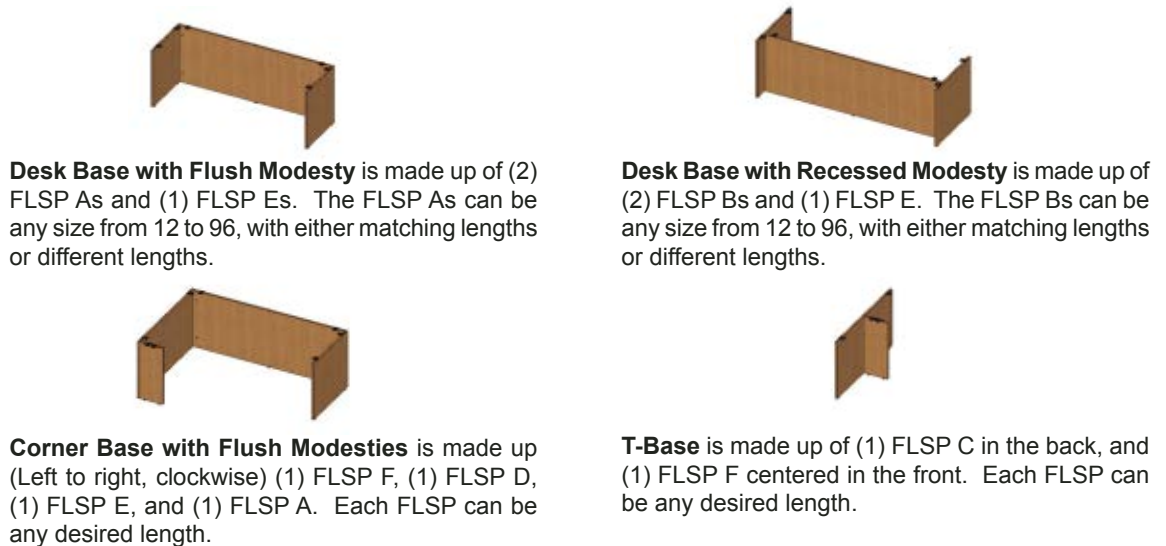

## Product Description

Full Laminate Support Panels are used to create freestanding worksurface applications such as desk shells, returns, corner bases, carrols, tables as well as private office floor support. Each full panel is 27 5/8 tall with a 1 inch glide. When used in conjunction with standard AIS worksurfaces, heights to the top of the worksurface will range from 28 5/8 to 29 1/2 inch tall. The Worksurface Mounting Plates are attached to the TOP of the panels as shown, thus leaving the brackets hidden from view and keeping vertical surface laminates free of holes for reversing and reconfiguration. Each FLSP includes 2 - 3 Worksurface mounting plates, 2 - 3 glides, (1) Worksurface Splice Plate, Appropriate QTY of Pins and Cams and Screws. All hardware is installed when components are field installed, based on required orientation of FLSPs. NOTE - FLSPs A - D are nominal width LESS 1/8 inch (ie 24 - 1/8 = 23 7/8). FLSP E is nominal LESS 2 1/4 to accommodate the thickness of the 2 panels on either side. (ie 72 - 2 1/4 = 69 3/4). FLSP F is nominal Less 1 3/16 to accommodate the thickness of a single panel on one side. (ie 12 - 1 3/16 = 10 13/16).

FLSPs are connected with a series of Pins and Lock CAMS providing a rigid yet simple means of connection. Each type of FLSP has a different function and configuration of male pins and female cams, as shown below. The six available Full Laminate Support Panels (FLSP) are REVERSABLE by turning UPSIDE DOWN, thus simplifying specification and reconfiguration. Each FLSP is available in widths from 12 to 96 inches in 6 inch increments, creating unlimited combinations of worksurface support elements. For this reason, FLSPs are ORDERED SEPARATELY. The following pages are a guide to FLSP applications.

A simple way to understand the applications for FLSP are to consider their use in combinations like those listed below. These simple configurations will be used over and over in freestanding furniture applications. Each configuration can have FLSPs of varying widths and depths to accommodate almost any worksurface size.

# Universal Combination Legs

## Product Description

Universal Combination Leg is available in black, brushed steel or, with an additional upcharge, painted to match standard trim colors. With a unique set of adapters, legs can be converted from standard peninsula legs to equal height mobile legs, extended mobile legs, nesting legs, or extended height legs. Standard legs are sold in a kit with (1) 24 3/4 leg (Black, brushed or painted), (1) 2 11/16 extender and (1) 7/16 high glide with 1 inch of adjustment. Total height of standard kit is 27 3/4 - 28 3/4 inches. By removing extender, Standard kit can become a nesting leg with a height of 25 1/8 - 26 1/8 inches. Adding a caster to the bottom of the standard glide brings the height back to match a standard kit height of 27 3/4 while allowing adjustment of the caster to 28 1/2. Thus standard legs can be converted to mobile legs and back with the same base leg unit. Casters are ordered SEPARATELY. Note: Extender, Glide and Caster are always black. Legs ship disassembled and flat.

# L Series Wardrobe Towers

## Product Description

Square front doors and drawers with **Brushed Nickel** loop pulls. Wardrobe includes coat closet, cupboard with adjustable shelves, and a choice drawer options. File drawers have full depth, smooth riding ball bearing suspensions. One lock located on cupboard door locks entire unit. Cabinet is 23 1/2" w x 23 1/2" d x either 52" h or 64 1/8" h, and may be ordered with the wardrobe door on either the left or the right side. Lock cores are removable with removal keys and master keys are available. Keying towers alike requires removal of pre-installed lock cores and installation of keyed alike core sets in the field. **Wardrobe storage towers are available on a 6-8 week leadtime only. Call AIS Customer Service for leadtime quote.**

## Keying Alike

Lock cores are removable with removal keys and master keys are available. Extra lock cores are available for keying towers alike, but may not be ordered without locks. Keying laterals alike requires removal of pre-installed lock cores and installation of keyed alike cores in the field. For laterals, pre installed locks must be removed with a lock core removal key. Replacement/key alike cores will use the same removal key and master key. All AIS storage units can be keyed alike including pedestals, lateral files, storage cabinets, storage towers and flipper doors.

# Tasklight Cord Managers

**DiVi™**

## Product Description

Tasklight cord managers engage to panel hanger frame slots. Managers are available in 3 heights, 3", 11" and 16". Use 16" to achieve a full height finished aesthetic for managing tasklight cords under full height shelves, flipper doors, or under half height shelves hung level with full height shelves on 67" high panels. Use 11" to achieve a full height finished aesthetic for managing tasklight cords under half height shelves on 53"H panels. Use 3" for managing cords above tackboards, or double them up for any of the above situations when a full height manager is not required. Tasklight cord managers are black only to match tasklight cords and are non-handed for use on either the left or the right side of a panel. Hanger frames can accommodate only one tasklight cord manager. Managers will not fit behind tackboards.

# Power / Data Pole Shell

## Product Description

Pole kit includes (2) 68" pole sections, (2) 68" covers, (1) pole coupler, (2) 68" dividers, (4) pole to panel mounting brackets, (1) ceiling shroud, (1) 72" length of perforated metal strip for attaching pole to ceiling grid, and mounting hardware. Order ceiling feeds separately.

### Grid attachment strip - 72"

length can be cut to fit and bolted to pole and ceiling grid with hardware provided.

**Pole Cover** - Snaps in place to seal vertical channel.

**Divider** - Attaches to pole shell threaded studs with rounded safety "acorn" nuts. Divider may be mounted on centered or 60/40 split to accommodate more data cables.

**Pole Coupler** - Slides into both halves of pole. Four threaded screws are tightened to form rigid pressure fit.

**Mounting brackets** - Engage opposed on panel hanger frames to lock lower section of pole to panel. Bracket threaded studs and rounded safety "acorn" nuts attach pole to brackets.

**Pole Shell** - is relieved on one end to provide means of egress for data cables and ceiling feeds. Pole top and bottom sections are identical

# Desktop Clamp Power and Data Module

## Product Description

Desktop Clamp Power and Data Module provide an affordable solution to desktop power requirements. Unit clamps to back of worksurfaces. Recessed back chamber allows for tight fit to panel face. 6' cord plugs into standard base duplex receptacle of the desired circuit. Unit has three wired alike receptacles which carry the circuit of whichever duplex receptacle they are plugged into. Unit is available with or without hard wired IDC voice/data data jacks which may be terminated in an isolated chamber inside unit. Unit measures 9" wide x 2 3/4" deep x 2 1/4" high.

# Interact JR Pop UP Power and Data Module

## Product Description

Interact JR Pop UP Power and Data Modules provide an affordable solution to desktop power requirements. Interact JR is designed to fit into a 4 1/2" wide x 4 1/4" deep hole cut into 1 1/8" OR 1 1/2" standard work-surface. Unit bolts to worksurface from underneath. Unit hangs down 4" underneath worksurface when in "down" position and stands 4" high when open. Industrial magnet latch keeps unit in open position. 6' cord plugs into standard base duplex receptacle of the desired circuit. Unit has two wired alike receptacles which carry the circuit of whichever duplex receptacle they are plugged into. Interact JR is available with or without hard wired IDC voice/data data jacks which may be terminated in an isolated chamber inside unit. Call AIS Customer Service to order worksurfaces with cutout.

# Element Chairs

## Product Description

Backrest incorporates elastic mesh (U.S. designed and manufactured) to reduce seating fatigue and maximize ventilation. Synchronal seat plate with 2:1 ratio knee-tilt mechanism. When backrest tilts 2 degrees, the seat only tilts one degree. The backrest can be locked at 5 different positions and can recline a full 20 degrees. Chair has adjustable height lumbar support, padded arm rest adjustable to 5 different positions, pneumatic seat height and tilt tension adjustments, high density and resilient seat foam for added durability and comfort, heavy duty 5 prong die-cast aluminum base with anti-slip treads and larger robust 60MM wheels. Chair backrest constructed of high impact, fiber reinforced polypropylene, seat front is waterfall style which promotes more comfort. **Element Executive rated up to 350 lbs, Element Task 250.** Meets or exceeds appropriate strength and durability of ANSI/BIFMA X5.1-1993, and also meets California state code CA-117 and Canadian code for fire retardancy.

# L Series Laminated Face Pedestal - 24"

## Product Description - 10 Unit Minimum

L Series Laminated Square Front Pedestal with **Brushed Nickel** loop pulls. Box drawers and File drawers have full depth, smooth riding ball bearing suspensions. All pedestals are structural to provide worksurface support and fasten directly to worksurface with screws. All pedestals are lockable with (2) LL keys supplied. Lock cores are removable with lock removal keys. Master keys are also available. Extra lock core sets are available for keying pedestals alike, but pedestal may not be ordered without locks. Keying pedestals alike requires removal of pre-installed lock cores and installation of keyed alike core sets in the field. Pedestals are configured for front to back letter sized filing and include (1) Side-to-Side/Legal Filing Bar per file drawer. Box-Box-File pedestal includes (1) box drawer pencil tray. Order a second tray separately. Box drawer dividers may be ordered separately. All AIS storage units can be keyed alike, including pedestals, lateral files, storage cabinets, storage towers, and flipper door units. Adjustable Height is 27 1/2" to 29".  
**Actual Depth of Pedestal is 22"**, Actual Width is 14 3/4".

**Note: There is a 10 unit minimum for Laminated Face Pedestals.**

# L Series Laminated Flipper Door Units

## Product Description - 10 Unit Minimum

L Series Laminated Flipper Door Units have a **square front**, are 12 inches in depth, and provide binder height, lockable overhead storage. Door opens and stores above top cover pan. Shelf ends have locking "swing cams" to prevent dislodgement. Flipper Door Units ship unassembled. Shelf bottom will receive tasklights. L Series Laminated Flipper Door complete unit includes (2) full height shelf ends, (2) shelf pans, (1) laminated flipper door front, (2) keys, and mounting hardware. Order flipper unit that corresponds to panel width. All flipper doors are lockable with (2) keys supplied. Lock cores are removable with removal keys and master keys are available. Extra lock cores are available for keying flipper doors alike, but flippers may not be ordered without locks. Keying flippers alike requires removal of pre-installed lock cores and installation of keyed alike cores in the field. All AIS storage units can be keyed alike, including pedestals, lateral files, storage cabinets, storage towers, and flipper door units. Laminated door weighs 7 lbs. when fully extended.
